- **Cosmetic Dentistry (Bleaching, Bonding & Veneers)**

The Practice

To be truly modern, today's dentistry should meet all of its patients' expectations. It should be dedicated to its patients' dental health, offering all the latest dental techniques and procedures. It should use advanced technology to create a beautiful mouth and a perfect smile for each patient, while reducing any possibility of pain. All of this should be accomplished with friendliness, thoughtfulness, and professionalism. At our practice, we strive to achieve this ideal in modern dentistry.

Brian LeSage is a Magna Cum Laude graduate of the University of Maryland Baltimore College of Dental Surgery and one of only 327 dentists in the world accredited by the American Academy of Cosmetic Dentistry—as well as one of just 48 Fellows of the Academy. This means he has the training, experience and level of achievement to beautify your mouth while optimizing your dental health.

Our goal is to create a dental practice where each staff member is a highly trained dental professional. A practice offering technology so advanced and sophisticated that it makes "painless dentistry" a practical reality. A practice so agreeable that you feel cared for before you even sit in the chair. And a practice that, once you are seated, makes it possible for your dental dreams to come true, sculpting a smile that is second to none.

Degree
